

Foreword

We often see the beauty of the forest but do not always realize the tremendous contribution that trees make to our lives for recreation, clean air and water, homes for wildlife and the general well being for every citizen of Tennessee. Our Tennessee forests also play a major role in the Tennessee economy for forest landowners, the forest industry and Tennessee employees and provide a wide range of products for each of us.

Primary forest products industries use roundwood, or logs and convert it into a product such as hardwood lumber or paper. A secondary processor uses the primary product and adds value or processes it further; for example they may manufacture furniture from hardwood lumber.

This is a directory of the primary and secondary forest product using industries that are located in the state of Tennessee. The purpose of the directory is to help bring together potential customers, suppliers and manufacturers of forest products in the state and outside of Tennessee as well.

The information in the directory is possible through the cooperation of the Tennessee forest industry who supply data to the many Division of Forestry foresters and technicians who gather the data from the hundreds of facilities across the state. We have tried to make every effort to be accurate and complete, however, if errors are found please contact the Department of Agriculture, Division of Forestry in Nashville, Debra Dawson at 615 837 5540 so she can correct the information.

This has been a cooperative project between the U. S. Forest Service, Southern Research Station, Forest Inventory and Analysis and the Tennessee Department of Agriculture, Division of Forestry and the data collected in 2010 is for the production year 2009.

Directory of Tennessee's Forest Industries
