TIER 1: Persistently Lowest-achieving Schools Include:

- 1) 5% of Title I High Priority Schools with the highest numerical Final Rank Index; and
- 2) Title I High Schools with a graduation rate less than 60 percent for any 2 of the last 3 years.

TIER 2: Persistently Lowest-achieving Schools (Title I Secondary (High) Schools but not "served" by Title I with Low Income Family =>35%) Include:

- 1) 5% of Title I Secondary Schools eligible but not "served" by Title I with the highest numerical Final Rank Index; and
- 2) Title I Secondary Schools eligible but not "served" by Title I with a graduation rate less than 60 percent for any 2 of the last 3 years.

Rank within each pool of schools determined as follows:

The numerical rank index is determined based upon the following series of calculations:

- 1) The current year math score for all students is ranked by sorting schools from highest to lowest math percent proficient and advanced;
- 2) The current year reading/language arts score for all students is ranked by sorting schools from highest to lowest reading/language arts percent proficient and advanced;
- 3) The math and reading/language arts ranks are summed for current year rank index;
- 4) Two prior years are ranked using the same method;
- 5) Two prior year ranks are averaged for prior years rank index;
- 6) Current year rank index and prior years rank index are summed to create the combined rank index;
- 7) If a school has failed adequate yearly progress (AYP) 6 years or more, the combined rank index is multiplied times 6 (lack of progress factor) for the final rank index.
- 8) Lastly, five percent of schools with the highest numerical final rank index are identified.

Notes:

High priority schools are defined as schools with an improvement status or those in improvement, corrective action, or any form of restructuring as specified in ESEA. Elementary and secondary schools are weighted equally.

PK-2 schools with no AYP status from a receiving school have been removed from the school list and are not included in the ranking.

For schools serving both grade spans, high school achievement data is used.

Secondary schools are defined as high schools.
